Yawar Abass

Intern@IITD | Full Stack Developer (Next.js, MERN) | Exploring AI/ML

Srinagar, Jammu & Kashmir, India

Summary

I am a Software Developer with 1.5+ years of experience specializing in React, Next.js, and High-Performance Web Architectures. My expertise lies in building scalable frontends and optimizing legacy systems to achieve top-tier performance and SEO. Currently pursuing my Master's in Computer Science, I am deepening my focus on Backend (MERN, FastAPI) and Agentic AI. My work involves engineering stateful AI workflows using LangChain and LangGraph, as well as developing Computer Vision pipelines for image segmentation. I am particularly interested in implementing research-driven solutions. I am actively seeking engineering or research roles where I can apply this dual expertise in modern web performance and AI integration.

Experience

Indian Institute of Technology, Delhi

Engineering Intern

February 2026 - Present (5 months)

Delhi, India

Codeyoung

Coding Mentor

September 2024 - February 2026 (1 year 6 months)

Bengaluru

Mentored 40+ international students in full-stack development, focusing on Python and React architecture for complex project builds.

Thence: The Product Success Company

Software Engineer

July 2024 - September 2024 (3 months)
