Yawar Abass

ML Engineer

<https://yawar.vercel.app>
<https://github.com/yawar-abass>
<https://www.linkedin.com/in/yawar-abass>

Aspiring AI/ML researcher with 1.5 years of experience in software development. Currently pursuing a Master's in Computer Science while building hands-on experience in deep learning (CNNs, Transformer), NLP, and LLM-based systems. Interested in research involving NLP and Diffusion Models

SKILLS

Languages C, Python, JavaScript, TypeScript, HTML, CSS, Java,
ML PyTorch, NumPy, Pandas, Matplotlib, Langchain, Langgraph, Agents
Frameworks & Libraries: FastAPI, React, Next.js, SQLAlchemy, Alembic
Tools: Git, GitHub, Docker, Azure, Colab, Hugging face

WORK EXPERIENCE

Research Intern Jan 2026 — Present
IIT Delhi Hybrid

- Developed ML-based disease classification models to analyze real-time physiological data from IoT devices.
- Built specialized summarization tools to extract and condense critical medical insights from patient telemetry and historical health records.
- Evaluating various encoder architectures to determine the most efficient method for processing high-frequency medical time-series data.

Coding Mentor (part-time) Nov. 2024 — DEC. 2025
CodeYoung Bengaluru(IN)

- Taught 40+ International students web development and Python, helping them build key skills and projects.

SDE1 React AUG. 2024 — OCT. 2024
Thence Bengaluru(IN)

- Collaborated with design and development teams to build and deliver a high-quality front-end.
- Enhanced performance and accessibility, helping achieve **95+ Lighthouse scores** for core web vitals.
- Ensured cross-browser compatibility and responsiveness across all major devices and screen sizes (on Lamdatest).

Software Developer Nov 2022 — Dec. 2023
Wudav Brand Stories Kashmir(IN)

- Developed and optimized modern, responsive frontend solutions using **Next.js and Tailwind CSS**, converting WordPress websites and improving **SEO** to nearly **100%** on Lighthouse.
- Collaborated with cross-functional teams to deliver scalable Web solutions.

PROJECTS

Cervical Cancer Detection and Segmentation GitHub

- Developed a deep learning pipeline for **cervical cell segmentation and classification** using **CNNs** and **U-Net**.
- Utilized **Detectron2** to handle overlapping cell instances and improve segmentation accuracy.
- Trained and evaluated the model on the **SpikMed dataset** for precise cell classification and region identification.
- Tech: Python, PyTorch, Detectron2, U-Net, OpenCV, NumPy, Matplotlib.

Legal Email Assistant – AI-Driven Email Analysis and Drafting GitHub

- Built a production-ready AI system that analyzes legal emails, extracts structured information, and generates professional draft replies using Groq Mixtral LLMs.
- Developed a FastAPI + LangChain + LangGraph backend with Celery, Redis, and PostgreSQL, and a modern Next.js frontend for viewing analyses and generated drafts.
- Tech: FastAPI, LangChain, LangGraph, Groq Mixtral LLM, Celery, Redis, PostgreSQL, Docker, Next.js, Tailwind CSS.

EDUCATION

Master's In Computer Science - (Pursuing) SEPT. 2024 — SEPT. 2026
University of Kashmir Kashmir, India

Bachelor's of Computer Science - (8.5 CGPA) Apr 2020 — Dec 2023
Govt. Degree College Anantnag Kashmir, India

Coursework: Data Structures and Algorithms, Operating System, DBMS, Computer Architecture, Computer Networks, Cyber Security, Statistics, AI/ML

CERTIFICATIONS

- Machine Learning Specialization [Coursera - Andrew Ng](#)
- Solved almost **120+** Problems on Leetcode ([Profile Link](#))
